

Assignment -1
Python Programming

Assignment Date	26 September 2022
Student Name	Natheem J
Student Roll Number	73151921032
Maximum Marks	2 Marks

Question-1:

Write a program which will find all such numbers which are divisible by 7 but are not a multiple of 5, between 2000 and 3200 (both included). The numbers obtained should be printed in a comma-separated sequence on a single line.

Solution:

```
l=[]
for i in range(2000, 3201):
    if (i%7==0) and (i%5!=0):
        l.append(str(i))
print(','.join(l))
```

```

```

Question-2:

With a given integral number n , write a program to generate a dictionary that contains $(i, i*i)$ such that i is an integral number between 1 and n (both included). and then the program should print the dictionary.

Suppose the following input is supplied to the program:

8

Then, the output should be:

{1: 1, 2: 4, 3: 9, 4: 16, 5: 25, 6: 36, 7: 49, 8: 64}

Solution:

```
n=int(input("input a number"))
d=dict()
for i in range(1,n+1):
    d[i]=i*i

print (d)
```

The screenshot shows two windows. The left window is a text editor titled 'assign 2.py - C:\Users\gurun\OneDrive\Desktop\assign 2.py (3.9.0)' containing the following code:

```
n=int(input("input a number"))
d=dict()
for i in range(1,n+1):
    d[i]=i*i
print(d)
```

The right window is a 'Python 3.9.0 Shell' window. It displays the following output:

```
Python 3.9.0 (tags/v3.9.0:9cf6752, Oct 5 2020, 15:34:40) [MSC v.1927 64 bit (AMD64)] on win32
